

Future Development

Long term development

- Inclusion of cardiac arrest data
- Join up with MINAP & CCAD

Where does this join up with local outcomes & MINAP?

- Reports
- Output
- Links with MINAP / hospitals
- CCAD / NHSIA
- Cardiac Arrest

Database - Version 2

Feedback:

- SEACAG pilot
- Prior to seminars
- Following seminars
- Email: chd@asancep.org.uk

Updates included in Version 2

- Drugs
 - "Close proximity to hospital"
- Oral drugs
 - "Not given - reduced consciousness"
- Thrombolysis checklist
 - "more than one exclusion criteria"
- History
 - "Other"

Updates included in Version 2

- Hospital codes
 - updated list (MINAP)
 - “Not recorded”
 - “Code not available”
- Time rules for validation changed
 - to allow for ‘running calls’
- Pain score
 - menu changed

Additionally it is likely there will be

- Expansion of the data set at a local level
 - additional fields can be added by Trusts to meet local requirements
- Expansion of query/ reporting function time related reports
 - administration of drugs - aspirin, GTN, thrombolytics etc.
 - additional queries and reports can be written so that the information held in Trusts database is interrogated fully
 - Please ensure all additional queries are carried out on a copy of the database to avoid corruption of the data

All of this should be notified to the ASANCEP so all Trusts can benefit.
