

*Includes the Core Data set of the RCP

RCP data set	SEACAG data set	Field Level	Parameter	Options	Definition	Type	Installation note
X	✓	M	Trust Identifier		Unique Ambulance Trust Identifier allocated by ASA/JRCALC	Coded (N)	See appendix one
X	✓	M	Patient Incident ID		Patient incident identifier - must be unique to the patient - can be any of the following :- PRF serial no, CAD ref or CAD & Date ref - If CAD is the unique identifier and it is not recorded on the PRF then the reference MUST be traced via another source	Text	This unique identifier MUST also be used in the field labelled Patient Incident ID in the Incident detail table.
X	✓	M	Date & Time Call received by EMS		Essential for trusts who recycle cad numbers on a 24 hour basis	D/T	
X	✓	M	Patient name		Default to unknown if pt unidentifiable / no unique number allocated. For use locally to track patients into hospital and track their outcomes - This information is for Local use only	Text	
X	✓	O	Address 1		For use locally to track patients into hospital and track their outcomes - This information is for Local use only	Text	
X	✓	O	Address 2		For use locally to track patients into hospital and track their outcomes - This information is for Local use only	Text	
X	✓	O	Address 3		For use locally to track patients into hospital and track their outcomes - This information is for Local use only	Text	
CDS_1.06	✓	O	Post Code		For use locally to track patients into hospital and track their outcomes - This information is for Local use only	Text	
X	✓	O	Location of incident		Input 'home' Or otherwise be as specific as possible. For use locally to track patients into hospital and track their outcomes - This information is for Local use only	Text	

Table 2 - Incident Details

SEACAG consensus Pre Hospital CHD data set

*Includes the Core Data set of the RCP

RCP data set	SEACAG data set	Field Level	Parameter	Options	Definition	Type	Installation note
X	✓	M	Trust Identifier		Unique Ambulance Trust Identifier allocated by ASA/JRCALC	Coded (N)	See appendix one
X	✓	M	Trust - JRCALC CHD Model	1 = Recognition of a possible candidate for thrombolysis and transmission of this information to the hospital before arrival, 2 = As above, but with general practitioners or other physicians who may be willing to cooperate with the Ambulance Service and give thrombolytics either on scene or within a small community hospital, 3 = Cooperation with general practitioners or other physicians who may be willing to cooperate with the Ambulance Service and give thrombolytics either on scene or within a small community hospital, 4 = Recognition of need, transmission of the electrocardiogram to a district general hospital, and administration of the thrombolytic by a paramedic on the responsibility of the physician who has seen the electrocardiogram and is aware of the clinical status, 5 = Administration of a thrombolytic on the paramedic's own initiative with or without confirmation of an appropriate ECG using a decision support algorithm such as Simoon's (at present only in LIFEPAK 12 electrocardiographs)	ASA/JRCALC Guidelines	Coded (N)	Default can be set during installation for most frequently used model. For any Trust Piloting / gradually rolling a new model - the field may be over written to reflect use of different model where appropriate
X	✓	O/M*	CAD No		Number allocated by Trusts Computer aided dispatch upon receipt of a call	Text	*Mandatory for any Trust relying on this field as their Unique patient identifier, use xxx if not recorded - then MUST be traced via another source. Can skip field if a different patient unique identifier is used.
X	✓	M	Patient Incident ID		Patient incident identifier - must be unique to the patient - can be any of the following :- PRF serial no, CAD ref or CAD & Date ref - If CAD is the unique identifier and it is not recorded on the PRF then the reference MUST be traced via another source	Text	This unique identifier MUST also be used in the field labelled Patient Incident ID in the Patient details table
CDS_1.02	✓	O	Date of birth			D	

Table 2 - Incident Details

SEACAG consensus Pre Hospital CHD data set

*Includes the Core Data set of the RCP

RCP data set	SEACAG data set	Field Level	Parameter	Options	Definition	Type	Installation note
CDS_1.05	✓	O	Age	Generated automatically where DOB is available	Generated automatically where the Date of birth is available	N	
CDS_1.03	✓	M	Gender	0 = not specified, 1 = male, 2 = female		Coded (N)	
X	✓	O	Station or Team ID	If not known type xxx	Station or Team identifier (to allow for local audit comparisons)	Text	
X	✓	O	Call type	1 = Emergency, 2 = Dr's Emergency, 3 = Dr's Urgent , 4 = Other	To assist in identifying AMI calls receiving a delayed response	Coded (N)	
X	✓	O	Crew mix	0 = Not specified, 1 = Technician, 2 = Paramedic, 3 = Paramedic trained to thrombolysse, 4 = Trainee crew	Used to identify the highest skill level available to the patient (This allows a realistic assessment of the treatments that any one patient should have received by the attending crew)	Coded (N)	
X	✓	M	Chief Complaint		The Chief complaint can be elicited from different places e.g. the CAD system, AMPDS, CBD or the Patient Report form. For continuity it has been decided to use the chief complaint identified on the Patient report form	Text	
X	✓	M	Destination Hospital	If not known type xxx	Unique Hospital Trust Identifier allocated by MINAP	Coded (N)	A table can be set up with your local hospitals on installation - see appendix two
CDS_5.03	✓	O	Past medical history	0 = None, 1 = Previous AMI, 2 = Previous Treated Angina, 3 = Hypertension, 4 = Diabetes, 5 = High Cholesterol, 6 = Peripheral Vascular Disease, (PVD), 7 = Asthma, 9 = Not known, 55 = More than of the above	The purpose of this field is to record those conditions that will have an impact on outcome	Coded (N)	
CDS_2.01	✓	O	Date & Time of onset of symptoms		If exact time not known estimate time to nearest 10 minutes. If unknown, code as xxx.	D/T	
CDS_2.04	✓	O	Date & Time of initial call for help if not EMS		Any call for professional help other than to the EMS e.g. NHS Direct, GP etc.	D/T	

Table 2 - Incident Details

SEACAG consensus Pre Hospital CHD data set

*Includes the Core Data set of the RCP

RCP data set	SEACAG data set	Field Level	Parameter	Options	Definition	Type	Installation note
CDS_2.02	✓	0	First call for help	1 = Called GP who saw the patient before calling EMS (use this also when Patient sees GP at surgery, out of hours clinic), 2 = Called GP who called EMS before seeing patient, 3 = Called 999, 4 = Called NHS Direct, 5 = Patient made own way to hospital, 6 = Called local help line, 7 = Called GP and told to make own way to hospital, 9 = Not known, 10 = Health Care Professional advised self-care	Who the caller made initial contact with...(In every case the caller refers to the patient or other non professional in attendance)	Coded (N)	
X	✓	0	First on Scene	1 = EMS, 2 = Initial response – EMS (e.g. first responder employed by Trust), 3 = Initial response – Non EMS (e.g. GP, community responder NOT employed by Trust), 4 = EMS – Non Emergency, 5 = Other	Who arrived to assist the patient first? (this could be anyone trained in the use of a defibrillator)	Coded (N)	
X	✓	0	Initial response with Defibrillator	1 = Yes, 2 = No, 9 = Not known		Coded (N)	
CDS_2.14	✓	0	Date & Time of arrival of initial HCP		HCP = Health Care Professional	D/T	
X	✓	0	Pain score 1	Enter a code between 1-10, 0 = Not specified, 70 = Trust does not use a pain scoring system, 99 = Trust dose not use 1-10 pain scoring system	To assist in identifying the patients perceived level of pain	Coded (N)	
X	✓	0	Pain score 2	Enter a code between 1-10, 0 = Not specified, 70 = Trust does not use a pain scoring system, 99 = Trust dose not use 1-10 pain scoring system	To assist in identifying the patients perceived level of ongoing pain	Coded (N)	
X	✓	0	Was pain score 2 taken post analgesic administration	0 = Not specified, 2 = Yes, 3a = N, 3b = Analgesia not administered, 70 = Pain score not used by Trust, 9 = Not known	To assist in identifying the patients perceived level of relief from pain (i.e. Can be used as a clinical indicator but not in isolation to other signs & symptoms)	Coded (T)	
X	✓	0	Respiration 1		Initial respiratory rate. If not recorded, code as xxx	Text	
X	✓	0	Respiration 2		Second respiratory rate. If not recorded code as xxx	Text	
X	✓	0	Pulse 1		Initial Pulse rate. If not recorded code as xxx	Text	
X	✓	0	Pulse 2		Second Pulse rate. If not recorded code as xxx	Text	

Table 2 - Incident Details

SEACAG consensus Pre Hospital CHD data set

*Includes the Core Data set of the RCP

RCP data set	SEACAG data set	Field Level	Parameter	Options	Definition	Type	Installation note
X	✓	0	Blood Pressure 1		Initial Systolic BP. If not recorded code as xxx	Text	
X	✓	0	Blood Pressure 2		Second Systolic BP. If not recorded code as xxx	Text	
X	✓	0	AVPU (alert, verbal, pain, unresponsive)	0 = Not specified, N = Not used by This trust, A = Alert, V = Responds to voice, P = Responds to pain, U = Unresponsive	Initial consciousness assessment.	Coded (T)	
X	✓	0	Glasgow Coma Score 1	Enter a code between 3-15 for initial Glasgow coma score, 0 = not specified, 70 = Trust does not use GCS	Provides a baseline assessment during the secondary survey	Coded (N)	
X	✓	0	Glasgow Coma Score 2	Enter a code between 3-15 for initial Glasgow coma score, 0 = not specified, 70 = Trust does not use GCS	Assists in identifying a benchmark measurement from the patients initial baseline. (i.e. Can be used as as a clinical indicator but not in isolation to other signs & symptoms)	Coded (N)	
X	✓	0	Oxygen Saturation - SpO2 - 1	Enter a % rate for Initial Pulse SpO2 reading, 0 = Not specified, 600 = SP02 reading too low, 700 = Trust does not use SpO2, 800 = Equipment not available	Provides a baseline assessment during the secondary survey	Coded (N)	
X	✓	0	Oxygen Saturation - SpO2 - 2	Enter a % rate for Initial Pulse SpO2 reading, 0 = Not specified, 600 = SP02 Reading too low, 700 = Trust does not use SpO2, 800 = Equipment not available	Assists in identifying a benchmark measurement from the patients initial baseline. (i.e. Can be used as as a clinical indicator but not in isolation to other signs & symptoms)	Coded (N)	
X	✓	M	Oxygen rate	2a = 60-100% - High, 2b = 59-25% - Medium, 2c = Under 25% - Low, 3 = Drug not administered, 4 = Administered but rate not recorded, 9 = Not known		Coded (T)	
X	✓	M	Type of ECG monitor	0 = Not specified, 1 = 3 Lead, 2 = 12 Lead		Coded (N)	
CDS_4.02	✓	0	Presenting rhythm	0 = Not specified, 1 = St segment elevation, 2 = Left Bundle Branch Block, 3 = ST segment depression, 4 = T wave changes - only, 5 = Other abnormality, 6 = Normal ECG, 9 = Not known	ECG will be used in determining treatment	Coded (N)	

Table 2 - Incident Details

SEACAG consensus Pre Hospital CHD data set

*Includes the Core Data set of the RCP

RCP data set	SEACAG data set	Field Level	Parameter	Options	Definition	Type	Installation note
CDS_4.07	✓	M	Aspirin - 300mg	1 = Drug not used by this Trust, 2 = Drug dose administered, 3 = Drug not administered, 4 = Drug administered prior to EMS arrival, 5a = Contra / allergy or sensitivity, 5b = Contra current gastric or duodenal ulcer, 5c = Contra Child under 12 years, 5d = Caution Asthma, 5e = Caution Pregnancy, 5f = Caution Kidney or liver failure, 5g = Caution Haemophilia, 5h = Caution current treatment with anti-coagulants, 9 = Not Known, 50 = More than one contra indication, 60 = Patient did not consent	Use of aspirin relative to this episode. ASA/JRCALC Guideline	Coded (T)	
X	✓	M	GTN - 300mcg Tablet or 400mcg metered aerosol dose, 2nd dose in exceptional circumstances	1 = Drug not used by this Trust, 2 = Single drug dose administered, 2b = Double drug dose administered, 3 = Drug not administered, 4 = Drug administered prior to EMS arrival, 5a = Contra Hypotension, 5b = Contra Hypovolaemia, 5c = Contra Head trauma, 5d = Contra Cerebral haemorrhage, 5e = Contra Viagra, 9 = Not Known, 50 = More than one contra indication, 60 = Patient did not consent	ASA/JRCALC Guideline	Coded (T)	
X	✓	M	Entonox - self administered	1 = Drug not used by this Trust, 2 = Drug administered, 3 = Drug not administered, 4 = Drug administered prior to EMS arrival, 5a = Contra Severe chest injuries where a pneumothorax may be present, 5b = Contra Severe head injuries with impaired consciousness, 5c = Contra The bends (decompression sickness), 5d = Contra Violently disturbed psychiatric patients, 5e = Caution Use with caution in patients who have taken alcohol or illicit drugs, 9 = Not Known, 50 = More than one contra indication, 60 = Patient did not consent	ASA/JRCALC Guideline	Coded (T)	
X	✓	M	Atropine - 500mcg = 0.5mg, up to 2 doses = 1mg	1 = Drug not used by this Trust, 2a = Single drug dose administered, 2b = Double drug dose administered, 3 = Drug not administered, 4 = Drug Administered prior to EMS arrival, 9 = Not Known, 60 = Patient did not consent, 70 = No venous access	ASA/JRCALC Guideline	Coded (T)
